- ' Revenue, expenditures, and state spending to local governments;
- ' Bids, purchases, and contracts for materials and supplies;
- ' The capital outlay process;
- ' Departmental internal auditing, administrative control, and reporting; and
- ' Powers, duties, and laws relative to budgeting, accounting, and regulating of appropriations.

This is an annotated copy of the Management and Budget Act, Public Act 431 of 1984, as amended through and including 1999 PA 8. The Act was compiled by the Legislative Service Bureau in June 1999.

Comprehensive indexes included with this copy of the Act provide Members and staff with the ability to quickly locate desired and/or significant sections of the Act. Indexes provided in this document are: an index of key words, an index of definitions, and an index of reports.

This publication was indexed by Jeanne Dee, Administrative Assistant, House Fiscal Agency. Thanks to the Legislative Service Bureau for its compilation of the Act and to House Fiscal Agency staff for their index review and suggestions.

18.1244 Scope of construction appropriation; direct labor charges; resident inspector; indirect or administrative overhead costs; separate accounts; design and construction requirements; contract to complete construction of project; conditions.

Sec. 244. (1) Except as otherwise expressly provided or as provided in section 246, a construction appropriation includes, where applicable, costs for land; professional services, including engineering and inspection services; all construction trades work; utilities; site work; on site supervision; equipment; furniture; and furnishings for a completed facility ready for use. The appropriation for a project authorized in a budget act shall be charged with any direct labor performed on that project by employees of the state agency for which the appropriations are made. For each construction project for which the department is an agent, the department shall determine the need for a resident inspector to provide on site supervision. The department may employ and assign the resident inspector with the inspector's salary to be paid from the project account, or from the account designated by the department. If the department approves, a qualified employee of the state agency's regular staff may be the resident inspector with the inspector's salary to be paid from the state agency's operating funds. This subsection shall apply to all projects regardless of when the appropriations were made for the project. The direct labor charges and corresponding credits shall be made in accordance with the systems and procedures prescribed by the department. Charges shall not be made to projects for any indirect or administrative overhead costs, except professional services by a state agency if the professional services are approved by the department and if the department is the agent for the project and provides professional services or administers and supervises the project. The director may establish separate accounts within an appropriation to permit a state agency, community college, or institution of higher education to make expenditures for equipment, furniture, and furnishings. The director shall carry out this act and shall exercise the best professional judgment in the design and construction of all projects included within a budget act so that the design and construction meets the requirements of the projects in the most economical and efficient manner, with particular emphasis on future maintenance and operating cost.

(2) A contract to complete the construction of a project for which construction appropriations are made in a budget act shall be made upon the conditions that the total cost for the completion of each facility, ready for use, shall not exceed the total cost authorized for each respective project; that the obligations for payments for each project, during the

fiscal years subject to this act, shall not exceed the amount appropriated for each specific facility by this and previous budget acts; and that the contract may be awarded before the beginning of the next fiscal year if the terms of the contract provide that payments shall not be made until after the first day of the following fiscal year, except in amounts previously appropriated.

Sec. 246. (1) The release of allocations may be approved when the legislature has specified either a total authorized cost or has appropriated an amount sufficient to complete the designated project. The authorized cost of projects shall only be established or revised by specific reference in a budget act, by concurrent resolution adopted by both houses of the legislature, or inferred by the total amount of any appropriations made to complete plans and construction.

(2) Expenditures under a capital outlay budget act shall be authorized when the release of the appropriation is approved by the board. The board shall approve the release of construction appropriations when the director certifies that a project can be accomplished within the appropriation or authorization and that the project is in compliance with this act. For each project certified, the board, upon the further recommendation of the director, shall approve the release of only those amounts required to complete the project according to the recommended purpose and scope as provided in an appropriation act. Contracts or other commitments shall not be incurred or obligated which will result in the completion of a project which exceeds this purpose and scope. A state agency, community college, or institution of higher education shall not make any commitments for a project until after the release of the appropriation pursuant to this act. The board may approve the release of a part of any appropriation for the purpose of preparing the planning or bidding documents or for investigations which may be necessary to determine whether or not the project can be completed within the appropriation.

However, each project which has been authorized for planning for 3 years or more and which has not been authorized for final design and construction shall be terminated, unless the project is specifically reauthorized in a budget act.

(3) Appropriations made in any budget act for final design and construction shall not lapse to the fund from which they are appropriated at the end of the fiscal year, but shall continue until the purposes for which the sums were appropriated are completed. However, each project that has been authorized for final design and construction for 3 years or more and where construction has not commenced shall be terminated, unless the project is specifically reauthorized in a budget act.

(4) Except as otherwise provided in this section, the balance of any capital outlay project other than a planning project shall not lapse at the end of the fiscal year for which the appropriation was made, but shall continue for not more than 2 fiscal years occurring after the fiscal year for which the appropriation for the project is made.

(5) A capital outlay project may be continued beyond 3 fiscal years if the bid for the start of construction of the project is awarded before the end of the second fiscal year occurring after the fiscal year for which the appropriation for the project is made.

(6) A capital outlay project which is for purchase of property may be continued beyond 3 fiscal years if a contract to purchase property is entered into before the end of the second fiscal year occurring after the fiscal year for which the appropriation for the purchase is made but only the amount necessary to complete the purchase of the property pursuant to the contract shall be carried forward.

(7) A capital outlay project may be continued beyond 3 fiscal years if a federal grant award is pending and the federal rules preclude the award of the bid before the end of the second fiscal year occurring after the fiscal year for which the appropriation for the project was

made, but shall not be continued beyond an additional year unless the bid for the start of construction of the project is awarded.

(8) If the bid for the start of construction of the project is awarded before the appropriations for the project are scheduled to lapse pursuant to subsection (4) or (6), the unobligated balance of the appropriations for the project shall not lapse but shall continue for 23 months after a project is substantially completed.

(9) If a capital outlay project is subject to a legal action, the balance shall lapse pursuant to subsections (2) to (8), or 30 days after the legal action is settled, or 30 days after a final order is entered, whichever is later.

(10) An unexpended balance which is to lapse pursuant to this section shall lapse to the fund from which the appropriation is made.

(11) A grant or grant-in-aid appropriated for the demolition, acquisition, construction, repair, or maintenance of capital assets shall not be reduced, adjusted, delayed, impounded, lapsed, or otherwise altered by the director for any purpose without legislative approval and shall be carried forward until awarded, in full, to the recipient of the appropriation consistent with legislative intent.

Sec. 391. legislative and judicial branches of government or from funds constitutionally dedicated to specific purposes.

(2) Based upon needs, the director shall recommend to the governor a reduction of expenditures authorized by the appropriations, either direct or open-ended, for that fiscal year. The governor shall review the recommendations of the director and shall prepare an order containing reductions in expenditures authorized so that actual revenues for the fiscal period will be sufficient to equal the expenditures. The governor shall give not less than 5 days' written notice to the members of the appropriations committees specifying a time and place for a joint meeting of the governor and the appropriations committees, at which the governor shall present to the appropriations committees the governor's recommendations and copies of the governor's proposed order.

Within 10 days after the receipt of that order by the appropriations committees, each appropriations committee, by a majority of its members elected and serving, shall approve or disapprove the order. Upon approval by both appropriations committees, the director shall implement the order.

(5) After the approval by both appropriations committees pursuant to subsection (3) or (4), a copy of the order of the governor and resolutions of both appropriations committees approving it shall be filed with the secretary of state and the order shall become effective.

Administrative transfers shall not include adjustments that have policy implications or that have the effect of creating, expanding, or reducing programs within that department. Those transfers may be disapproved by either appropriations committee within the 30 days and, if disapproved within that time, shall not be effective.

(2) A transfer of appropriations within any department other than an administrative transfer pursuant to subsection (1) shall not be made by the state budget director unless approved by both the senate and house appropriations committees. If the state budget director does not approve transfers adopted by both the senate and house appropriations committees under this subsection, the state budget director shall notify each member of both the senate and house appropriations committees of his or her action within 15 days after the senate and house appropriations committees' final approval.

(3) A transfer approved by the appropriations committees shall not be effective unless it is identical in terms of funding sources and dollar amounts.

(4) A transfer approved pursuant to this section shall constitute authorization to transfer the amount recommended and approved. However, the amount shall be reduced by the state budget director to be within the current unobligated amount of the appropriation.

(5) Capital outlay appropriations may be transferred from a state agency, community college, or institution of higher education to provide necessary funds for the completion of an authorized capital outlay project, if the transfer is approved by JCOS and the appropriations committees. (2) Except as otherwise provided in this section, spending of state matching money in an appropriation shall be maintained in the proportion appropriated. When federal money is earned in an amount less than appropriated and the matching requirements have not been reduced, spending of any state matching appropriation shall be reduced accordingly.

(3) When federal matching formulas are adjusted to increase the federal share of the costs of a program, spending of any state matching appropriation shall be reduced accordingly. Within 15 days after receipt of a notice of such a change, the state agency shall notify the state budget director. The additional federal funds available under these conditions are appropriated for the program intended.

(4) When federal matching formulas are adjusted to reduce the federal share of the costs of a program, the affected state agency shall notify the department. After receipt of the notice of such a change the state budget director shall take appropriate corrective action. For purposes of this subsection, a transfer to increase the state matching appropriations shall not be permitted under section 393(1).

(5) In an appropriation financed by multiple sources, any state general fund-general purpose appropriations shall be used only after the restricted funds available have been expended.

(6) Transfers between operating funds for financing shall be expended in the proportion appropriated and unused funds at the end of the fiscal year shall lapse to the fund from which appropriated.
